Product Preview Card Component

This was a project to the Interactive card details form challenge on Frontend Mentor. This was created using React whit Typescript.

The challenge

Users should be able to:

- View the optimal layout depending on their device's screen size
- See hover and focus states for interactive elements

Link: https://lyr01.github.io/interactive-card-details-form/

Tip Calculator App

This is a solution to the Tip calculator app challenge on Frontend Mentor. This was created using React whit Typescript.

Users should be able to:

- View the optimal layout for the app depending on their device's screen size
- See hover states for all interactive elements on the page
- Calculate the correct tip and total cost of the bill per person

Layout created using:

- Flexbox
- CSS Grid
